

Head Hunters and Fight for Equality

Kaylyn Gabbert

Developing New Worlds

Full Sail University

March 6, 2016

Mr. Lucas

Premises:

Head Hunters premise: This tale follows a music nymph and her friends learning to be themselves and facing the deadly Head Hunters (poachers of supernatural beings). When Angel gets her powers she finds out she's on the list. Her friends who are endangered species were-creatures, angels, and witches are well. Head Hunters want the were-creatures' pelts and the angels' wings and such. How would you feel if people wanted to kill a family member of yours just for a piece of them?

I dedicated this to my father, my parents, Richard, and my family. I could not accomplish this without their love and support.

Fight for

After the events of the world discovered under their noses the want to persecute the always told us. Will survive the humans make their lives more unbearable than usual?

Equality premise:

the last story the human other species lived right whole time. Now they different as history has our young heroes persecution? Or will the

Historical Background Information:

In this world, other species such as music nymphs, angels, were-creatures, and witches that all look just like any usual human. They've been alive as long as the human race. Soon after they all came to be the other species realized the humans wanted to kill them because they were envious that they weren't blessed with powers like everyone else, so they went into hiding. As time went on and the humans caught a glimpse of the supernatural world they grew to fear what the supernatural beings may do to them and slaughtered so many innocents in every species.

This story takes place in 2010ish and for the most part the timeline is the same; there is a hidden timeline for personal music devices because there's a species that needs music to live. This species is called music nymphs, and they need music to live the way we need blood coursing through our veins. Witches really wanted to protect the music nymphs as well as other species that had more than human abilities especially after the witch trials started. During that time not only were innocent humans killed but so were innocent witches, angels, were-creatures, and music nymphs. Not that humans minded killing innocents because fear of what could be done has ruled humans for lifetimes.

Main Characters:

Angel Shudo: Angel Shudo is the main character that the story follows. She's a music nymph, and she very kind. When Angel was born and her parents found out she was a music nymph, her father was ecstatic to have a very special powers but her mother was jealous because she was the only one in the family who was human. At first, she was a little behind on the curve with her powers, but when her powers came it they came in at full blast putting her in danger because Head Hunters have nearly caused the music nymph race to almost be extinct which was why her father was so happy his little girl was a music nymph. She's intelligent, courageous, and friendly. She would never let her friends down, and she never wants to let fear rule her life anymore after her mother abused her verbally and physically and that drove a small wedge between her and her father. Her mother loved tearing her down because she, in her own words, doesn't want her daughter to get a swelled head. She was always afraid to go home, but once her friends told her dad what was going on things got better for them. Besides not telling her father about her abusive mother Angel has always been very close with her father. Angel with the rest of Cassandra, Celeste, Aria formed a cover band for fun and to be a distraction as their friends find out more about the Head Hunters. Angel's the singer in the band, Black Velvet Rose.

Cassandra Atwater: Cassandra Atwater is one of the people in the main group of characters. She's not the main character, but she's worth getting to know. She's the person who sends Angel into her hero's journey. She's a music nymph. She was home-schooled most her life before her and her family were forced out of their home by a home invasion. Cassandra has a brother and sister that are twins and happily married parents. She's very artistic as is her sister. She used to be shy before she moved onto the boarding school campus. Cassandra is the drummer in the all-girl cover band, Black Velvet Rose.

Celeste Baker: Celeste Baker is a bright girl who was kept to herself before the story started. Angel and Celeste a tough relationship before they knew about the Hunters. She had a tough life before moving to the school and staying there. She's another supporting character that's

worth getting to know. She was disowned by her parents for her looks. Just in case there is no accurate photo of Celeste. She has two-toned skin in patches a soft caramel color and a dark chocolate color that she was born with. She has naturally orange and black striped hair. She's a were-tiger which describes her appearance in her human form. Celeste is the bassist in Black Velvet Rose.

Aria Kuester: Aria Kuester is closest to Celeste. She was really Celeste's first friend before Celeste got to know everyone else. She's most important to opening Celeste's character up. Not much is known about Aria, but she's an intelligent person who is a great friend. She's loyal to the end. Aria is a guitarist in the all-girl cover band Black Velvet Rose that also includes Angel Shudo (the main character), Cassandra, and Celeste. Aria is a very talented young witch who's a master at protection spells. Not much is known about this young woman, but I hope to get to know more as the story progresses.

Supporting Characters:

Mitzi Aeria: Mitzi is a seventeen-year-old angel whose Angel's best friend and roommate. She's very protective of her friends, and when her friends fight she won't pick sides because they are still her friends. She loves examining weapons and researching weapons, this is especially seen after the Head Hunters. She's great at finding flaws to weapons.

Stryker Howett: Stryker is a very protective werewolf is a close friend to Angel and Mitzi. He's a gamer. He's kind, gentle, and intelligent. He always looks out for his friends. He has more of a mysterious past that no one quite knows yet. With everything going on it's hard to get to know someone.

Hayden Johnson: Hayden is one of Angel's friends back from her hometown. He is an angel and comes from a big family. His parents are happily married and love to encourage their children to do their best. He had four younger brothers in the beginning of Head Hunters, but by the end he gained a brother.

Cayden Atwater: Cayden is Cassandra's younger brother and a very powerful music nymph. He's only thirteen, and has talents that most music nymphs do not have thanks to his parents always encouraging and supporting him and siblings.

Daniya Atwater: Daniya's Cayden's twin sister and she's only like a few minutes younger. Daniya is very intelligent and artistic. She designs clothes and makes her own sometimes. She, like her brother, is very talented for her age, but she prefers to use her music nymph skills with basic self-defense so she won't draw attention to herself for not being human.

Cassadee Johnson: Cassadee is Hayden's mother. She's a werewolf. Cassadee is a loving mother, and loves spending time with her kids' friends as well. She's a well-known psychiatrist who doesn't always work for money like when it's an extreme case. She wants kids to be kids as long as they can, so when things started getting tough because of the Head Hunters she made sure the kids took breaks and just hung out like people usually do.

Locations:

- 1. *Veldime Point:*** Veldime Point is a boarding school for all the supernatural beings of the world. It's owned, run, and protected by a witch by the name Lily Clearwater. Ms. Clearwater takes her job very seriously. The school is a k-12 school for all of them. The school has several different courses including classes every school has like language arts and math. The school also offers different history classes because they think their students should know human history to fit in and then their own histories as well. The sciences also are a bit different because the school thinks their students should know their own genetic make-up.
- 2. *Veldime's Courtyard:*** The courtyard is a great place for kids to unwind outside and soak up the sun. It was created to make students feel safe and be able to have a good time. Once you start the getting old enough to get to the high school grades (ninth grade) you're allowed to take visits off campus with some supervision until you're at least a junior in high school. It's a beautiful green grassy area with stone benches and a couple trees to give it shady spots. The courtyard also has a fountain as well.
- 3. *Atwaters' Dorm:*** This wasn't a big location for our heroes until the start of Fight for Equality. Throughout Head Hunters our heroes were a bit shaken, and Cassadee wanted to make sure they had a place to wind down and talk about all that had happened. She feels if the teenagers are open about everything they'll have a better chance at having normal lives. Taralyn Atwater, Cassandra's mom, and her husband opened up their staff dorm to the kids because they wanted them to feel safe even with the full blown knowledge of Head Hunters and the humans now hating them. After all, not all students know everything about the Head Hunters, and that is how the Veldime staff and students' parents want it.

Additional World Information:

There are four species besides humans; music nymphs, angels, were-creatures, and witches. The way that a person becomes any of the species is through genetic defects is the best way to call it. You could be in the same family and be different species. It's been seen with Angel's family, the Johnson family, and Celeste's family. Angel's family has one angel, a human, and a music nymph. The Johnson family has two angels, two humans, two music nymphs, and two werewolves. Celeste is the only weretiger in her family, and both her parents are human. There's also been rare occasions where later in life a human's DNA can be genetically altered naturally, but that is very rare.

- ***Music Nymphs:*** Music nymphs need music to live the way we need blood coursing through our veins. They have one vital external organ that they need to protect that regulates the music notes that are in their blood. The music notes in their bloodstreams protect them from most external harm. Music nymphs powers include having a radar that tells them when people nearby are allies, neutral, or enemies as well as being able to heal from small injuries. They can create music barriers as well as attack with music waves.
- ***Angels:*** Angels aren't at all religious in this world. They have feathery wings and can fly when they want. They can actually hide their wings in their back when they need to. Angels are able to read minds and speak telepathically to how ever many people they want to at one time. If an angel has minor injuries they can heal themselves.
- ***Were-creatures:*** There are only two different were-creatures mentioned in this world so far but there are more to come. The two were-creatures you hear about are werewolves and Celeste, the weretiger. They aren't like you've heard about in legends and human lore. When they are in their were-form they are a mix between their animal form and human form. Moons don't have anything to do with their transformation, but when their blood pressures rises they start to transform.
- ***Witches:*** Not too much is known about witches in this world, but I do know witches really wanted to protect the music nymphs as well as other species that had more than human abilities especially after the witch trials started. During that time not only were innocent humans killed but so were innocent witches, angels, were-creatures, and music nymphs.

Story Synopsis:

Head Hunters: The first scene starts with Angel getting her powers and Cassandra meeting Angel for the first time and letting Angel know her life is in danger because of her powers. The Head Hunters start creeping toward the protected school for the supernatural, Veldime Point. Students had to be sent home to protect them as a group of courageous students, Angel and her friends, decided to find out more about the Head Hunters. Their goal was to get the Head Hunters to back off the school. They succeeded only to be outed to the human community by an upset student's rampage.

Fight for Equality: The story starts with the main cast and their family and friends writing blog posts about who they are besides a different species. They wanted people to understand all they want is a normal life as well. There is a war about to happen between humans and the other species as well as supernatural beings themselves. Humans try to put them in a sort of POW camp until it is revealed that supernatural beings have worked their way into the governments of every country, and where a lot of countries have been at peace knowing supernatural beings exist in America, as always was behind the curve. The world grudgingly accepts them with no real option.

Story Excerpt:

Head Hunters:

She looked unsure for a second before speaking again. “I want you to plug yourself into your favorite song on that device then I want you to concentrate on the drums, guitar, bass, or vocals; whatever’s your favorite, and I want you to try to attack the whiteboard with it. Do you understand?”

I nodded then I plugged myself into ‘Given Up’ by Linkin Park. In that song, I loved the vocals the best, it was the strongest, but I had to wait till a certain part before I could concentrate on trying to destroy the whiteboard. I waited for two minutes in then opened my mouth to scream like the singer. The attack, if that’s what you can call it, didn’t work. At two minutes thirteen seconds, still didn’t work. But then at two minutes twenty-six seconds I let out a scream like a banshee at the whiteboard. I couldn’t close my jaw until two minutes and forty-four seconds. Then I opened my eyes to see I had blown through about three solid walls.

I cautiously looked at Ms. Clearwater, scared she’d kick me out for all the damage I had just done.

She looked at me and smiled. “Congrats, Ms. Angel. Your powers have come in.”

Fight for Equality: This is a blog entry from Aria’s point of view. She has to go Asami online in this story because humans have rediscovered the supernatural species, and have been spreading fear about them through the media.

You want to know the truth? None of us wanted humans to know of our existence. We are like animals, as much as I hate to admit it, and tend to steer clear of humans unless a social situation says otherwise. Can you blame us? With your high murder rate as a species?

Anyway, I’m Asami, a young witch, guitarist of Black Velvet Rose. I’m doing pretty great in school, and my friends are amazing. I also have a lovely girlfriend. She will post on here as well under the name Miranda. She’s drop dead gorgeous, but she doesn’t always think so because her skin has two different skin tones, and her hair is naturally striped black and orange like a tiger but in reverse. She’s the bassist in our band and all around great person. Though she does wake up with nightmares about the Head Hunters. I have to quiet her down and stay up with her for a while before she can fall back asleep. But poachers aren’t the worst thing. Ignorant, judgmental humans are. I want everyone who reads this to know whoever makes my girl cry by harsh words or any other way. You hurt her, I hurt you. And the same thing if any of you hurt my friends.
